12. Write two paragraphs of 200 words on one of the topics:

**Conservation of natural resources in our State.**

Resources mean the availability of natural materials. From the inception of our Earth there are many substances found. Resources play an important role in Man's existence. The basic requirements needed for humans are air, water and food. Apart from these, natural resources too are needed for man's survival. Some of the non-renewable resources are iron, lead, gold, silver etc. In these some were renewable and some where non-renewable resources. The non-renewable resources are the rays of Sun, strong movements of wind etc. The five things that can be done to conserve natural resources are as follows: Using water judiciously via using less water during day-to-day activities. Turn off lights when not in use. Promoting the use of renewable energy. Implementing the principle of 3 R's (Reduce, Recycle, Reuse). Earth's natural resources include air, water, soil, minerals, plants, and animals. Conservation is the practice of caring for these resources so all living things can benefit from them now and in the future.

Natural resources are essential for survival. Land, forests, water, fisheries, minerals, and air—these are all important to sustain life. But years of overexploitation in the name of technological advancement have amplified cases of deforestation, wildfires, oil spills, and other ecological hazards. If overexploitation continues in the same trajectory, there will be no natural resources left for future generations. Thus, it's crucial to take action now. Fortunately, there are many ways to conserve natural resources, many of which you can do independently. Read on to learn about the growing environmental crisis and how you can help preserve the country's natural resources.

2. **The pleasures of reading.**

Books are our best companions. Reading separates the wise from the foolish. Being well-read makes us more aware of our surroundings, street-smart, and makes it difficult for us to be deceived by people. It is, therefore, vital for all. Reading is both pleasant and profitable. Here are a few benefits of reading:- Reading helps us broaden our knowledge and gain new insights. Our parents always encourage us to read ever since we're small and young. Reading takes us away from the worries of life. It takes us into a world free from petty concerns and preoccupations. One can anticipate new opportunities and hazards by reading. Additionally, you'll be able to judge a circumstance more precisely if you're a reader. Reading is a great way to unwind after a stressful day and indulge your imagination. Nothing in this world beats the pleasure of reading books. It broadens our knowledge, stimulates and drives us, and raises our doubts about a subject. Many of us enjoy reading more when we read independently, at our own pace, and in our style. Such reading stimulates our curiosity, teaches values and motivates us.

It is never too late to start reading. Someone who is not yet a reader can start by picking up something as short as a newspaper article to read and gradually enhance the time and quantity of their reading. By exploring different

Respected Sir,

Reg: Scarcity of water

I would like to bring to your kind notice that the areas in and around are suffering from acute water shortage. There is only one tank which is being filled once in two days. Due to hot climate and the need for water, the tank gets emptied in just 2 hours. Water Lorries come rarely and the time arrival is not regular. The London suburban areas find it even more difficult as they are simply ignored. Kindly announce the regularity of water Lorry service and ensure for better water supply.

## Question tags

A question tag is formed by inverting the subject and verb of a statement. If the subject is a noun, it may be necessary to change the noun into a pronoun, such as in the statement "The dog hasn't eaten dinner yet, has he?" Question tags can also be formed with dummy pronouns like it and there.

### Negative Question Tag Examples

Negative question tags are used when the speaker's statement is positive. For example:

- He wants chocolate ice cream, doesn't he?
- Today is your birthday, isn't it?
- They are twins, aren't they?

These question tags are all considered negative because they include the negative form of the auxiliary verb.

### Special Cases of Question Tags

There are also special cases in which the question tag may seem surprising. Sometimes the question tag does not resemble the statement, such as with adverbs, imperatives, invitations, and same-way question tags. The use of the words nothing, nobody, could, would, should, and the phrase I am are also considered special cases.

### Adverbs

Sentences that include negative adverbs of frequency like never, rarely, and hardly are always considered negative statements, even though the main verb is positive. The question tag should therefore be positive. For example, "We rarely eat out at restaurants nowadays, do we?" or "You never go to the gym, do you?"

### Negative Question Tags and "I Am"

When a speaker makes a positive statement with the phrase "I am", the question tag changes to the special form of "aren't I?" For example, "I'm an intelligent person, aren't I?"

Marie was born in 1867 in Warsaw Poland, where her father was a professor of physics. At an early age she displayed a brilliant mind and a blithe personality. Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French University, where she earned her master's degree and doctorate in physics. Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day. One of whom was Pierre Curie. Marie and Pierre were married in 1895 and spent many productive years working together in the physics laboratory. A short time after they discovered radium Pierre was killed by a horse drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heartbreaking anguish. Despondently she recalled their close relationship and the joy that they had shared in scientific research. The fact that she had two young daughters to raise by herself greatly increased her distress.

Curie's feeling of desolation finally began to fade when she was asked to succeed her husband as a physics professor at the Sorbonne. She was the first woman to be given a professorship at the world-famous university. In 1911 she received the Nobel Prize in chemistry for isolating radium. Although Marie Curie eventually suffered a fatal illness from her long exposure to radium she never became disillusioned about her work. Regardless of the consequences, she had dedicated herself to science and to revealing the mysteries of the physical world.
