Guest Lecture on Fundamentals and Application of Heat Transfer

Dr. R.Thangraj Pandian insights focused on **Fundamentals and Application of Heat Transfer** on **16.04.2025**. The study and application of heat transfer, thermodynamics, and energy systems. It plays a crucial role in industries such as power generation, automotive, HVAC, and renewable energy. The field deals with optimizing energy conversion, reducing heat losses, and improving system efficiency.

He expert in thermal engineering has made significant contributions to enhancing energy efficiency and sustainability in thermal systems. His work emphasizes the integration of renewable energy sources, such as solar thermal and geothermal energy, into traditional thermal systems. He also advocates for innovative designs in heat exchangers and energy systems to reduce energy consumption and environmental impact.

The guest lecture on Fundamentals and Application of Heat Transfer was both informative and engaging. It successfully enhanced the knowledge base of students and motivated them to explore advanced topics in thermal engineering. The department thanked the speaker for his valuable time and contributions.
